Project Design Phase
Problem – Solution Fit Template

Date	26 MARCH 2026
Team ID	69bf8007c1eab7090225893f
Project Name	AUTOMATING EMPLOYEE DATA
Maximum Marks	2 Marks

Problem Statement

- **Employee data is stored manually (paper / Excel)**
- **Difficult to manage and update records**
- **Time-consuming process**
- **High chance of errors and data loss**
- **No proper security for employee information**

- **Target Users (Customers)**
  - **HR Department**
  - **Company Admin**
  - **Small & Medium Businesses**

- **Existing Situation**
  - **Manual data entry**
  - **No centralized system**
  - **Hard to search employee details**
  - **Data duplication and mistakes**

- **Proposed Solution**
  - **Develop a web-based system**
  - **Store employee data in database (MySQL)**
  - **Provide login system for security**
  - **Features:**
    - **Add employee**
    - **Edit employee**
    - **Delete employee**
    - **View employee list**

- **Problem–Solution Fit**
  - **System reduces manual work**
  - **Improves accuracy of data**
  - **Saves time for HR/Admin**
  - **Provides secure data storage**
  - **Easy to access and manage**

- **Benefits**
  - **Faster data management**
  - **Better organization**
  - **Improved efficiency**
  - **Secure and reliable system**
